

Department of Applied Mathematics

Delhi Technological University, Bawana Road, Delhi-42

Research/Project Lab- RL-1

The lab is a unique and invaluable resource for B.Tech. (MC), M.Sc. (Mathematics) students and research scholars in our department. It provides students with the opportunity to gain experience in their chosen field of study and develop the research skills necessary to succeed in the competitive job market. With the help of experienced faculty members, the lab helps students think critically, analyze data, and use evidence-based approaches to solve problems. Ultimately, this lab enables our students to turn their ideas into reality and prepare them for success in their future careers.
