

## ABOUT DTU

With a history stretching back over 69 years, providing an academic milieu amid adequate space for ingenious research as an integral part of curriculum design, Delhi Technological University is strongly identified with engineering education in India. The University has been a forerunner, and led the way in reform movement maintaining a compatibility with values and professional morality. DTU takes pride in being one of the major contributors in planning and construction of India's infrastructure. In DTU we endorse and cultivate the purity of mind as the strongest currency, with an impressive resolve to renovate and upgrade our knowledge infrastructure. DTU aspires to be ranked amongst the leading universities globally. Consequently, DTU's mission is to edify individuals to be competitive not only in India, but all over the world.

## ABOUT THE CENTRE

To create awareness, inspiration among the students and teachers about the need of higher dimensions of education in becoming enlightened citizenship which is achieved by imparting techniques and knowledge for promoting human values and thereby making better engineers with the better use of ethics and moral values in professional and personal lives.

## Faculty Development Program

on

## “Ethics and values in Technical Education in Context of National Education Policy 2020”

(online)

April 15<sup>th</sup> - 19<sup>th</sup>, 2021

Organized by

Centre for Value Based Education  
Delhi Technological University

Bawana Road, Shahbad, Daulatpur,  
New DELHI—110042

## Introduction

Value Based Education (VBE) has now been made an integral part of the New Education Policy 2020. The Purpose of the **NEP 2020** is “to develop good human beings capable of rational thought and action, possessing compassion and empathy, courage and resilience, scientific temper and creative imagination, with sound **ethical** moorings and **values**.”

Faculty enriched with knowledge of value education and ethics and personality development in technical education can contribute towards the holistic development of the students. This FDP enables faculty to understand ‘what is valuable’ for human happiness which cannot be achieved without ethics and overall personality development. The main objectives of the FDP are to create a morally sensitive environment among faculty and in academic institutions/society so that they can in turn train the students during their course of stay in the University.

In today’s world, human values are losing its relevance. In this context it is very important to highlight the relevance of self-mastery through values. The proposed course is therefore, expected to serve as a platform for discussion on the theme and promote faculty who practice the culture based on values.

## Course Content

Course will focus on the following areas:

- Holistic Effectiveness and Human Values
- National Education Policy 2020
- Existing Practices and Experiences in imparting Human Values in Education
- Technical Education in National Building
- Confluence of Modern Education with Traditional Values
- Personality Development and Character Building through Education
- Practical approach to realize full human potential
- Ethical Value Environment and Technical Education
- Social Development through Education
- Heart full Communication

We want that education by which character is formed, strength of mind is increased, the intellect is expanded, and by which one can stand on one's own feet.

## Target Group

The target group for this programme would be faculty members, Academicians, Professionals, scientists, Research Scholars and the officers/staff associated with them.

## Date

The programme will be organized **online** from 15<sup>th</sup> April -19<sup>th</sup> April 2021.
